Integrate easily with QuickBooks and Dynamics GP as well as many POS systems.

SECURITY.
Protect your customers' and your business's information with industry-leading security solutions.

SUPPORT.
We have the best customer service in the biz. We are here for you.

STREAMLINED PROCESS

It's hard to beat an all-in-one solution. Integrating your card processing system with Dynamics GP Integration means you'll no longer have to worry about double data entry or human error. With Dynamics GP Integration, you can:

- Accept payment via a variety of methods and GP modules
- Automatically post payments to Accounts Receivable and General Ledger
- Automatically mark invoices as paid
- Automate recurring billing, create custom payment schedules, and automatically email receipts to customers

REDUCED COSTS

You're in the business to make money, so it can be frustrating seeing all your hard-earned income going toward fees or being drained by inefficiencies. Integration with Dynamics GP Integration can help:

- Maximize interchange discounts and reduce transaction fees
- Qualify cards at the lowest possible rates
- Prevent downgrades
- Save money with purchase and corporate card transactions
- Increase productivity, thereby reducing overhead

CUTTING-EDGE SECURITY

Keeping your business's and your customers' information safe and secure is of the utmost importance. Our Dynamics GP Integration helps you minimize any risk or liability with its leading-edge security solutions:

- Data encryption and tokenization for maximum security
- PCI compliance to prevent cyber fraud
- Off-site cloud-based storage for customer card information
- Ability to set individual user permissions

AND THE LIST GOES ON

The ways in which Dynamics GP Integration can help your business flourish are almost too many to name! But here are just a few more, to whet your appetite:

- Maintain profiles within the customer card
- Process and store electronic payments off-premises in the cloud for simple, safe and secure processing
- Store payment methods for repeat customers via tokenization on First Data cloud
- \$0 setup fees, \$0 upgrade fees, \$0 maintenance fees
- CardConnect supports Level 2 and 3 transactions to accept business, corporate, and purchase cards without downgrading them
- Certified developer for Microsoft Dynamics
- Set up customers on a recurring billing schedule
- CardConnect for Microsoft Dynamics GP is PCI compliant and utilizes the latest tokenization technology to provide the highest level of data security

GETTING STARTED IS EASY.

We could go on and on about all the benefits of CardConnect for Dynamics GP Integration and how it can help streamline your payment processing. But it would help to know a little more about you and your business and goals. Why not give us a call to chat about the best solutions for you?
